

FIRST-TIME SETUP

3-Day *Sprint*

A synced packing app for two people, one move, three days. Setup takes about 5 minutes – once.

Step 1: Get your Firebase config.

1. Go to console.firebase.google.com → *Add project*
2. Skip Google Analytics (not needed)
3. Click the web icon `</>` → register an app
4. Copy the `firebaseConfig` object
5. In the left sidebar: *Build* → *Realtime Database* → Create database → start in **test mode**
6. Paste your config below.

PASTE YOUR FIREBASECONFIG HERE

```
{
  "apiKey": "Alza...",
  "authDomain": "your-project.firebaseio.com",
  "databaseUrl": "https://your-project-default-rtdd.firebaseio.com",
  "projectId": "your-project",
}
```
